
Web Development

SEO Solution provides creative services such as

- Website design
- Brochure designs
- Logo designs

Web designs

SEO Solution provides web designs with a difference. We provide web designs ranging from brochure-type websites to complex database-driven and content management systems depending on your requirements. As a company specialising in Search Engine Marketing, the web designs will be built on a "search-engine-friendly" infrastructure to get you ready for your search engine marketing efforts.

Small websites

Ideal for new businesses looking for a cost effective internet presence especially:-

- first websites for businesses who wants to "get a feel" first with a need to inform users of their services and their contact details
- one-off event that needs to be publicised over the internet, such as an exhibition, presentation to be held with a need to provide information and contact details

Content Management Systems

Ideal for businesses who have needs for a content management system on their websites because you want to be able to update your own website on a regular basis.

Accessible websites

Ideal for businesses who realises and understands the benefits of making their existing website assessible to those with disabilities. See [Web Accessibility](#) for more details.

Our designers, marketers, developers and programmers have worked on a wide range of projects for small and large corporations, across a variety of industries. We specialise in adding complex data driven functionality to your existing website, as well as providing complete new build solutions.
